

Salman Samian

Senior Front-End Developer

About me

I am a Front-end developer with extensive experience in modern technologies and software development processes. My expertise includes developing projects using React Native, Android, iOS, React.js, and Next.js.

- Implementing and developing projects based on software engineering principles
- Problem-solving and effective decision-making
- Time management and precise planning according to deadlines

WORK EXPERIENCE

Upwork, Codementor as Remote Mentor and Front-End Developer

As a Senior Front-end Developer, I have collaborated with both startups and enterprise companies to enhance and maintain their products. For more details on my experience and projects, please visit my profiles on Upwork and codementor platforms.

ClickStudio as Remote as Front-End Developer

Developed and published multiple apps using react-native and two Admin panels, with REST API, React Query, and [Socket.io](#), and CI/CD implementations.

Peley as Remote as Front-End Developer

Mobile application developer on Android and iOS platforms using the React Native stack, with REST API, React Query, and Socket.io.

Folad Fars as Remote Front-End Developer

Mobile application developer on Android and iOS platforms using the React Native stack, with REST API, React Query, and Socket.io.

Fara Dadeh Andish Gostaran Emad as Project Manager

Project manager for a game using Unity and Node.js, with Socket.io for player communications. Additionally, Slack, Jira, and GitHub were used for team coordination and to meet the project's needs and ensure alignment among team members.

Ertebatat dourbord fars as Back-End Developer

Full Stack developer with a focus on backend development. Additionally, I developed and implemented two mobile applications for Android and iOS. Implemented a management CRM and subscriber applications, as well as synchronized the support section with the company's VOIP system.

Skills & Projects

SKILLS

Core Technologies:

React.js, React Native, Next.js based on TypeScript, JavaScript

Mobile Development:

React Native, Android Development, iOS Development, React Native CLI

Navigation & Routing:

React Navigation, Stack Navigator, Bottom Tabs Navigator, Native Stack Navigator

State Management & Data Fetching:

Redux Toolkit, React Redux, Redux Persist, TanStack React Query, Axios

UI/UX & Animation Libraries:

React Native Reanimated, React Native Gesture Handler, React Native Linear Gradient, React Native Vector Icons, Lottie React Native, React Native Indicators, React Native Modal, React Native Modalize, React Native Collapsible

Maps & Location Services:

React Native Maps, Mapbox Maps, React Native Geolocation, React Native Get Location, React Native Geocoding, React Native Google Places Autocomplete

Media & File Handling:

React Native Image Picker, React Native Image Crop Tools, React Native Image Pan Zoom, React Native Image Zoom Viewer, React Native Photo Manipulator, React Native Sound

Storage & Persistence:

AsyncStorage, React Native Background Timer

Authentication & Backend:

Firebase, Firebase Auth, Firebase Storage, Google Sign-In

Form Handling & Validation:

Formik, Yup, Validator

Development Tools & Quality:

TypeScript, ESLint, Prettier, Jest, Babel

Additional Libraries & Utilities:

Lodash, Fuse.js, React Native SVG, React Native SVG Transformer, React Native Tab View, React Native Toast Message, React Native Device Info, React Native Contacts, React Native Clipboard, React Native Calendars, React Native Orientation Locker, React Native OTP Text Input, React Native Pager View, React Native SMS Retriever, React Native Version Number, React Native Get Random Values, React Native Community Blur, React Native Community DateTimePicker, React Native Community NetInfo, Shopify Flash List

Design & UI/UX:

Figma to Mobile App/Website, Responsive Design

Version Control & Development:

Git, CI/CD, Firebase CI/CD Xcode Cloud CI/CD

Platform-Specific Development:

Android Java/Kotlin, iOS Swift

Performance & Optimization:

React Native Performance Optimization, Memory Management, Background Processing

Testing & Quality Assurance:

Unit Testing, Integration Testing, Mobile App Testing

Security & Best Practices:

Secure Authentication, Data Encryption, API Security

Project Management & Collaboration:

Agile Development, Code Review, Documentation

PROJECTS

1. Mobile Application Developer at ClickStudioLTD — LingoLion Parent (Online Parenting App)

Developed the front end of a React Native mobile application with Apple Payments integration, using Jotai for state management, Zod for validation, and REST APIs. Implemented CI/CD pipelines via Xcode Cloud.

2. Mobile Application Developer at ClickStudioLTD — LingoLion Kids (Children's Educational Game)

Led front-end development of a React Native app using Formik, React Hook Form, Jotai, Zod, and Apple In-App Purchases. Integrated REST APIs and maintained CI/CD workflows through Xcode Cloud.

3. Mobile Application Developer at EasyDine — Restaurant Ordering App

Built and maintained a React Native-based food ordering platform with Firebase Authentication, TanStack Query, Redux, and Reanimated. Deployed CI/CD pipelines using Firebase and Xcode Cloud.

4. Mobile Application Developer at MingLinkApp — MingLink (Event-Based Social App)

Implemented the front end of a React Native app focused on online/offline events, integrating Firebase Authentication, Reanimated, TanStack Query, Redux, and REST APIs. Managed CI/CD with Firebase.

5. Mobile Application Developer at ClickStudioLTD — Nutrigochoice (AI-Powered Diet App)

Developed the front end of a diet and nutrition tracking app using React Native, TanStack Query, and REST APIs. Set up CI/CD processes using Xcode Cloud.

6- Mobile Application Developer at ClickStudioLTD — VoiceBuddy Parent (Online Parenting App)
Developed a React Native mobile app with Apple Payments integration, leveraging Jotai for state management, Zod for validation, and REST APIs for backend communication.

7- Mobile Application Developer at ClickStudioLTD — VoiceBuddy Kids (Children's Educational Game)
Led front-end development using React Native with Formik, React Hook Form, Jotai, Zod, and Apple In-App Purchases. Integrated REST APIs and managed CI/CD with Xcode Cloud.

8- Mobile Application Developer at Peley.Game — Peley (Multiplayer Online Game App)
Built a real-time multiplayer mobile app using React Native, Redux, React Query, and Socket.io. Implemented reactive programming, Firebase services, and form handling with Formik and Yup. Deployed CI/CD using Xcode Cloud.

9- Mobile Application Developer at BaToulid.com — BaToulid (B2B & P2P Commerce App)
Developed a mobile commerce platform using React Native and Redux, with REST API integration and Firebase backend support.

10- Mobile Application Developer at itswhere.com — itswhere (Online Delivery Service)
Implemented the front end of a delivery app in React Native using Redux, Firebase, Google Maps API, REST APIs, and Socket.io for real-time tracking and communication.

11- Full-stack developer at The Code Giant team

- Worked as a Front-end developer on a Data Intelligence project using NextJS, Ant Design framework, TypeScript, Redux, REST API, Mathematics, Algorithms, and Multilanguage. Contributed ideas and suggestions in team meetings and delivered updates on deadlines, designs, and development enhancements.
- Worked as a Front-end developer on a Financial application project using NextJS. Collaborated with the project manager to select ambitious but realistic coding milestones on pre-release software project development. Designed and updated layouts to meet usability and performance requirements.

12- Front-end developer at PauseSolutions

- Worked on the back-end side using NodeJS and MongoDB and updated the front-end using ReactJS, and Redux toolkit. Add camera features on the application I did pre-webserver configuration on Ubuntu Linux. Discussed issues with team members to provide resolution and apply best practices.

13- Full-stack web developer for an Online Shopping project using Fiat and Cryptocurrencies

- Worked on the back-end side with NodeJS and MongoDB and implemented and used AWS Lambda. Used ReactJS and Redux toolkit on the front-end side. Implemented the Cryptocurrency part using Web3 and Tron web grid for TRC20 and ERC20 networks, and added the Multilanguage feature.

14- Front-end developer at OXhain.com (Online cryptocurrency exchange)

- Worked as a Front-end team leader and developer on a project using Reactjs framework, Tailwind framework, Redux, REST API, Algorithms, and Multilanguage.

15- Built a Trello Power-Up using Next.js and Redux, integrating Stripe for payment processing to enable users to generate and manage reports directly within the Trello platform.

16- Developed two responsive admin panels using React.js, ShadCN UI for modern component styling, and TanStack Query for efficient server state management.

I am passionate about creating exceptional mobile experiences and committed to delivering high-quality, scalable solutions that drive real business value.

With my comprehensive expertise in React Native development, modern UI/UX practices, and proven track record of building robust applications, I am ready to dedicate myself to your company's mission and contribute to its continued success.

Thank you for considering my application and taking the time to review my resume.

I look forward to discussing how my skills and experience can benefit your team.

Best regards

Salman Samian
